## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4, 5 are rejected under 35 U.S.C. 102(b) as being anticipated by MAYER 6,915,171.

MAYER discloses a driver system for enabling a first plurality of functions comprising a second plurality of driver circuits (139, 159, 169), each operative at an output thereof one of two possible signal polarities depending on a state of the driver circuit (133) and a controller operative to recognize requests for enabling at least one of the first plurality of functions and to place the second plurality of driver circuits in states such that the driver circuit outputs will have appropriate signal polarities for enabling the at least one function request.

### ***Allowable Subject Matter***

Claims 1-3, 6 allowed over the prior art.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose or suggest selecting the first plurality of functions such that at least one of the functions can be enabled faster than at least one other function.

Art Unit: 2836

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. GONTOWSKI 4,820,935 teaches multiple function driver circuit.
